CTC-026 LTSPICE Standard.JFT File

LTSPICE Standard.jft File Background

The initial install of LTSpice comes with a limited set of JFET models stored in a filed called Standard.jft. This file is typically stored in location: C:\Users\YourUserName\Documents\LTspiceXVII\lib\cmp\standard.jft. InterFET recommends replacing this file with a more complete compilation of JFET models from a wide range of manufacturers. This compilation of JFET models is sorted by part numbers and lists the manufacturer in the part name with a "-" suffix. When the model manufacturer is unknown a "-GEN" is listed for Generic part. All of the models from the original LTSpice Standard.jft file are included in this newer file. The complete list of over 600 JFET models are listed below for your reference.

Standard.jft File

JFET Model Summary
